DETAILED ACTION

This office action is responsive to Divisional application 10/672,514, filed 9/25/2003.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121.

The disclosed invention can be divided into two patentably distinct groups:

I. Claims 1-3 and 9 are drawn to saving records on a bufferpage of memory, which falls under the category of file allocation and is classified in class 707 subclass 205

II. Claims 4-8 are drawn to managing a memory, classified in class 711 subclass 118.

The inventions are distinct, each from the other, because of the following reasons:

Inventions in Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention in Group I has separate utility such as saving records on a bufferpage of memory. The invention in Group II has a separate utility such as managing a memory.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

A telephone call was made to Bob Hails on 4/4/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Affirmation of an election must be made by applicant in replying to this office action. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
